

# Spatial Localization of Greenland Mass Wasting Using a 2-D Wavelet Decomposition of GRACE Data and Comparison to Physical Drivers of Ice Loss

Benjamin Getraer

September 30, 2018

## Abstract

### Key Points:

- 1.
- 2.
- 3.

## 1 Introduction

### 1.1 Previous Results

## 2 Objectives and Methods

## 3 Budget Justification

All data, code, sources, and software that will be used are either publicly available for free or already made available under licensing from Princeton University at no additional expense. The entirety of this project will be in data analysis and computer modeling, and no travel, data, or consumable supplies costs are anticipated.

## 4 Acknowledgements

Thank you to my Senior Thesis adviser Professor Laure Resplandy for your ideas, enthusiasm, and guidance. Thank you to my Junior Paper adviser Professor Frederik J. Simons whose patience and passion gave me the tools and confidence to pursue my interests and contributed greatly in the conceptualization and direction of this project. Thank you to the second reader of my Fall Junior Paper, Prof. Jessica Irving for feedback, suggestions, and encouragement. Thanks to Dr. Amanda Irwin Wilkins and “The Hare” writing workshop group for discussing and editing various figures and drafts. Thank you to Prof. Adam C. Maloof who taught me  $\LaTeX$ , and to Dr. Chris Harig for providing some of the data files. Thank you to Prof. Gabriel Vecchi for insight into atmospheric and oceanic processes. Thank you to Jean Getraer, Andrew Getraer, Jonathan Feld, Rae Perez, and Zach Smart for proof-reading various drafts of my Junior year work. Lastly, thank you to the numerous professors and graduate students in the Princeton Department of Geosciences and at Princeton Research Day for feedback, encouragement, and constructive criticism on the presentation of preliminary results.
